

Economic order and Economic steering

The community of human beings needs an organisation. This is what we call, **Social order**. She includes all culture, social, political, and economical relationships. A part of it is the economic order. She includes all frames adjustments for the economic action of the national economy, with the task to create the duty of humans and machines as well as arrange the distribution of goods to minimise the shortage for it.

The economic subjects decide which main emphasis they give to single person and their play of freedom (**Free enterprise economy**) or to the person community (**controlled economy**). Depend on the different idea, we can get answers for the main questions, where, what how many and for whom we will produce:

Economic order

capitalism = Free enterprise

Socialism = controlled economy

Property order	<ul style="list-style-type: none"> <input type="checkbox"/> Private property for capital goods <input type="checkbox"/> Private enterprise and organised firms 	<ul style="list-style-type: none"> <input type="checkbox"/> State property for capital goods <input type="checkbox"/> State controlled firms
Main elements	<ul style="list-style-type: none"> <input type="checkbox"/> Freedom of contracts <input type="checkbox"/> Freedom of location <input type="checkbox"/> Right freely to choose one's occupation <input type="checkbox"/> Freedom to chose job + place to work <input type="checkbox"/> Freedom of consumption <input type="checkbox"/> Competition on the market <input type="checkbox"/> Freedom of coalition 	<ul style="list-style-type: none"> <input type="checkbox"/> Missing of all freedoms <input type="checkbox"/> Subordinating principle <input type="checkbox"/> Central plan decide about wages and place to work
Economic goals	<ul style="list-style-type: none"> <input type="checkbox"/> Strive for profits 	<ul style="list-style-type: none"> <input type="checkbox"/>

Comparison of the different economic orders

The „real“ free enterprise economy and the controlled economy are ideal types, which have different parts with the economic orders in the reality.

The orders in our time are mixed, which includes different elements of the free enterprise economy and the controlled economy too. A mixed economic order like this, where we have more parts of the free enterprise economy, we call social market economy in the Federal Republic of Germany.

The state tries to steer the economic action, so that it doesn't run without any control.

Free enterprise economy = Offer and Demand regulate alone

Performances of Work

Objective conditions

- Technique, like manual equipment
- Organisation of working proceeds and method of the three-dimensional and time process
- Law and Order
- Social environment or pattern of leadership from the supervisor.

Subjective conditions

- Physical condition
- Qualifications
- Age of living
- Sex
- Motivation
- Physical and mental conditions of the human

To keep or to make better the human physically fit, we have to look the employees doesn't get to much stress. For example a service duty without any break time make the employee tired very fast and includes a lower performances too.

Fundamental we have to look for ergonomic knowledge's during the working process. So for example we must guarantee the correct noise abatement but also other factors like we have to check if they affect the working performance, like room colours, music kinds and places for breaks. If we prepare the working schedule for our staff, we should look for the biological rhythm of the human body. Normally we a High between 8:00 and 10:00 a.m. in the morning and we have a Deep between 1:00 and 3:00 p.m. in the afternoon

Also in the hotel business we have problems with the strain by work. To find better solutions for the employees must be our first target and than, the higher performances and the better profit are coming automatically.
